INFORMATIONAL SESSION

NORTH UNION PUMPING STATION REPLACEMENT PROJECT

The Lambertville Municipal Utilities Authority (LMUA) owns and operates a sewage pumping station, known as the North Union Pumping Station (PS), that provides sanitary sewage service for the north end of the City of Lambertville as well as the Borough of Stockton. The LMUA's North Union PS was severely damaged during Tropical Storm Ida and requires substantial work to put it back into proper operational condition. The LMUA has been working with FEMA over the past two years and, more recently, with the NJDEP on funding and approval of the work entailed with moving the project forward.

The LMUA anticipates beginning the construction project to replace the pumping station in April, 2024 when the LMUA will advertise for competitive bids for the project.

An informational session to describe the proposed project and answer any questions regarding potential impacts to those living, working, or patronizing any businesses in the vicinity of the construction has been scheduled for Tuesday, March 19, 2024, at 7:00 p.m. at the Justice Center. There will be no remote meeting capability. All are welcome. Please call the LMUA at 609-397-1496 with any questions prior to the session.
